

Floating Finn 600

SAIL, SWEAT AND SWIM

The Floating Finn enables the combination of two Finnish traditions.

First, when afloat and sailing it brings people in contact with Nature. Second, the on-board sauna reflects the tradition of rest and peace.

Although Finns like to enjoy Nature alone, the Floating Finn makes it possible to sail, sweat and swim with family or friends.

Floating Finn is built by elements. All parts; upper-, lower deck, sauna, railings, benches etc. are measured and planned by modern element technology to fit a van. A trailer is needed also for transporting of the 6,6 m pontoons.

The sauna platform measures about 20 m² and is protected by a stainless steel railings. Furthermore; an pontoon bridge of about 5 m² with the sailing stand allows for a won-

derful view over rivers and lakes.

Family or friends can sit on benches on both sides of the pontoon bridge and share the wonderful view from upstairs.

The Floating Finn brings people to places where they can enjoy the privacy of sauna or the silence of Nature or the sports of fishing. The stainless steel railings can be the place for a nice barbeque grill to prepare food.

The sauna measures 4 m² and there is place for 4 persons. The sauna is heated by wood and has a water container. The stainless steel pipe conveys the smoke outside. On the pontoon bridge the chimney is isolated so that people can't get burned.

So, are you ready to go sailing, sweating and swimming?

Technical Data

Length: 6.60 meter

Width: 3.30 meter

Height: 4.50 m (incl. element chimney 6 m)

Sauna: 2.4 m²

Top deck: 5 m²

Lower deck: 20 m²

Carried load: 3600 kg

Own weight: 1800 kg

Persons: 10 max.

Engine: 20 Hp

Speed: 5 knots (max.)

PRICE: 21.900 €
(VAT 0%)

Ex Works
(excl. engine)
